Living Right Insist on Rollite™

Patio with Rollite™ Rollscreens Skylight System

Living smart makes living right. Rollite™ Rollscreens horizontal skylight system presents the occupant the best of both worlds. The open patio is screened against the harsh sunlight in the day. At the push of a button, the Rollite™ Rollscreens skylight rolls back exposing a beautiful starry night. Another feather in the cap for Rollite™ Rollscreens, Singapore's premier rollscreens provider to the most discerning clients.

This new design application will continue to handle challenging requirements in futuristic architectural design and goes beyond a functional role alone such as adding colors into style, appearance and feel for residential and even commercial buildings, as succinctly put by A*STAR Industry Development Manager, Joshua Thong.
